- Drugs with a superscript of one "1" are HIV, Transplant, or Hepatitis B therapies. Please do a test claim to verify this is part of the client's specialty benefits and to determine appropriate copay, maximum day supply, point of service, etc.
- Drugs in **Brown** are dispensed at a CVS specialty pharmacy.
- Drugs in **Red** with asterisk (*) are Limited Distribution drugs and CVS does not have access, drug will be diverted to the CTS queue and processed by specialty.
- Drugs in **Green** indicate Specialty Distribution–non-specialty drug and will be diverted to the CTS queue and processed by specialty. If drug has an asterisk (*) CVS does not have access to drug.
- Drugs in **Blue** are Injectable Oncology Opt-In dispensed at Specialty, but not part of standard specialty offering.
- Drugs in **Purple** with a superscript 2 (2) indicates CVS has access to the drug and is choosing not to dispense drug at this time.
- Lowercase type indicates generic name and availability.
- Products on this list are applicable to clients on all Caremark platforms (QL & RxClaim).
- This list pertains to most Specialty clients but may not be applicable if a client has customized their Specialty drug list or is part of a legacy offering.
- Please verify benefits to ensure the exact specialty offering for client.
- This list is subject to change at any time as CVS is consistently engaged with manufactures regarding product access and or changes.

- Drugs in **Red** with asterisk (*) are Limited Distribution drugs and CVS does not have access, drug will be diverted to the CTS queue and processed by specialty.
- Drugs in **Green** indicate Specialty Distribution—non-specialty drug and will be diverted to the CTS queue and processed by specialty. If drug has an asterisk (*) CVS does not have access to drug.
- Drugs in **Blue** are Injectable Oncology Opt-In dispensed at Specialty, but not part of standard specialty offering.
- Drugs in **Purple** with a superscript 2 (²) indicates CVS has access to the drug and is choosing not to dispense drug at this time.
- Lowercase type indicates generic name and availability.
- Products on this list are applicable to clients on all Caremark platforms (QL & RxClaim).
- This list pertains to most Specialty clients but may not be applicable if a client has customized their Specialty drug list or is part of a legacy offering.
- Please verify benefits to ensure the exact specialty offering for client.
- This list is subject to change at any time as CVS is consistently engaged with manufactures regarding product access and or changes.
